Mary Ann Denman | UX Designer

As a User Experience Designer with a background in nursing and project management, I solve problems through my application of empathy. I design user-centered experiences that are engaging and accessible to provide an inclusive environment that achieves the required business goals while still allowing people to have dignity and feel respected. Personally, I enjoy volunteering and participating in innovative projects that support the needs of local community.

EXPERIENCE

Interaction Designer – WeCount – Remote
DECEMBER 2017 - PRESENT
- Work with a small team of designers and the organization itself to develop a 2.0 version of the product.
- Convert whiteboard sketches to wireframes in preparation for usability testing.
- Advocate the UX design process to help enhance the redesign of the website.

Information Architect/Visual Designer/Project Manager – Loss Prevention Tools – Seattle, WA
DECEMBER 2017
Had the pleasure of working with 2 other UX designers on a team with LPT, to deliver the MVP focusing on user research wireframes, clickable prototype, user stories, and flows to validate client's approach for a new loss prevention web app.

UX Designer – StringClub – Seattle, WA
APRIL 2017 - PRESENT
- Work through user experience for StringClub site, specifically the instrument and user profile pages.
- Helped to define application of Google material design.
